TECHNOLOGY

POWERSKIN

ULTRA

POWERSKIN carbon ultra

50% POLYAMIDE
47% ELASTANE
3% CARBON FIBER

Fina APPROVED

- Carbon ultra-cage (outside) – high density carbon cage for more intelligent compression
- Infinity loop with x-pivot point (inside) – for perfect body position, body rotation control and stroke efficiency
- Ultra-compression panels (inside) – for extra muscle support and targeted compression, where needed

intelligent compression | ultra compression panels | x-pivot construction

FLEX VX

POWERSKIN carbon flex

52% POLYAMIDE
47% ELASTANE
1% CARBON FIBER

Fina APPROVED

- Carbon Cage for intelligent compression
- V-Flex System on the front ensures greater freedom of movement
- X-shaped seams placement on the back improves fit and tension distribution
- Maximum range of motion
- Power return construction stores energy that releases during dives, kicks and turns

v flex system | power return construction | intelligent compression

AIR

POWERSKIN carbon air

61% POLYAMIDE
34% ELASTANE
1% CARBON FIBER

Fina APPROVED

- Carbon bands – intelligent compression meets comfort
- Ultra lightweight fabric
- Sleek construction
- Smartstretch shoulder strap
- Easy to put on

sleek construction | excellent compression | ultra lightweight fabric

ST 2.0

POWERSKIN ST

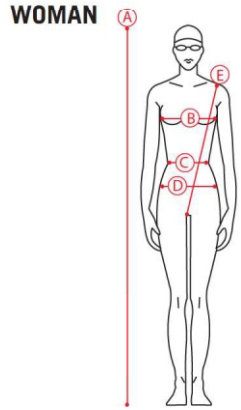
71% POLYAMIDE
29% ELASTANE

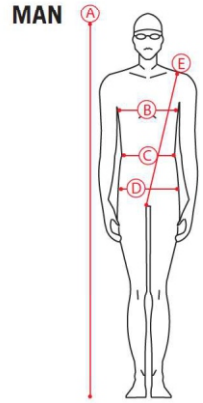
Fina APPROVED

- Extra flexible knitted fabric for high level performance
- Greater support and compression on core and legs
- Reinforced shoulder strap for better comfort and durability
- Ergonomic construction with low profile seams for perfect fit

extra life | excellent compression

SIZING SYSTEM





POINTS CM BODY MEASURES

A	Height	162	164	168	172	176	180	184

HOW TO TAKE MEASUREMENTS (valid for all powerskin racing section)

A · Height: To determine your height, stand up straight and measure the distance from the crown of your head to the sole of your foot.
B · Chest: Take the measurement over the fullest part of your bust.
C · Waist: Measure around the narrowest part of your waistline.
D · Hips: Measure around the fullest part of your hips.
E · Torso loop: In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point.

(**) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.
